## TRAFFIC GUIDANCE FOR DRIVERS COLLECTING OR DELIVERING GOODS AT GRANGE MILL QUARRY

ISSUE: 1

REVIEW: 0

DATE : 01.10.18

### ALL VEHICLES

When entering Grange Mill Quarry from a South West direction from the Hollybush crossroads you **MUST NOT** straggle the double white lines and cross onto any part of the opposite carriageway to enter the quarry concrete entrance apron.

### ARTICULATED AND SMALL RIGID VEHICLES

If there is an obstruction preventing you from entering the quarry entrance apron to access the North East entrance to the weighbridge; then you should enter the South West entrance and drive up the slope past the car park and pedestrian area whilst keeping to the speed limit (10 MPH) and turn around in the turning area provided.

When the North East entrance to the weighbridge is then clear you can drive down to access the Weighbridge whilst taking due care and attention driving through the signposted and warning lights of the pedestrian areas.

### LARGE RIGID VEHICLES

It is advisable for large rigid vehicles when entering the quarry concrete apron if the Weighbridge access to the North East is blocked to drive up the slope to the turning area and turn around and drive down the slope when the Weighbridge is clear.

Large rigid vehicles entering the site from the direction of the Hollybush can perform a 3 point turn if the concrete apron is clear, but must not reverse onto the carriageway prior to entering the North East entrance to the Weighbridge.

Large Rigid vehicles loading from the top of the quarry aggregate area can drive down the slope through the pedestrian area and parked cars on to the Weighbridge; then reverse off if they are exiting towards the Hollybush. It is advisable that when the vehicle is to exit the quarry towards Ashbourne that the vehicle approaches the Weighbridge from the plant and quarry stockpile route and exit the quarry safely without stragging the double white lines.

### GENERAL TRAFFIC GUIDANCE NOTES

For traffic guidance on site please refer to the Site Traffic Map document.

There are no restrictions on the type or size of vehicle the site can handle; though if in doubt please contact the quarry at least 24 hours ahead of arrival on 01629 540334.

Goods can be collected or delivered on weekdays between the hours of 6am and 4pm unless by prior arrangement with the management, and between 7am and 11am on Saturdays.

Grange Mill Quarry is accessible from both directions of the B5056. There is a low bridge (Height 14 feet) on the route traveling North East to the quarry on the B5056 from Ashbourne.

**DATE : 01.10.18**

After turning into the quarry concrete apron all drivers should report to the Weighbridge tare off their vehicle at the North East entrance and to also complete induction procedure and receive instructions for loading or unloading.

Where potential of risks are likely from a visiting haulier, arrangements will be made for a manager to visit the site to assess in more detail the risks involved and agree precautions.

Agreements between hauliers either collecting or delivering goods maybe specific, and it is the duty of the supplier or customer to ensure that if a third party is working on their behalf that they inform them of the safety agreements for the site. Special agreements may be agreed by either telephone, fax or email.

Any driver either collecting or delivering goods at the site should report any vehicle accidents, incidents, near misses and other safety concerns to the management and complete a near miss/ incident report form available from the Managers Office and the Weighbridge Office.

All drivers are authorised to refuse or halt the loading or unloading of their vehicle on safety grounds.

All palletised deliveries or collections will be unloaded by forklift truck or telehandler by a trained operative. The maximum lifting capacity is 2.5 tonnes. The point of unloading or loading will be designated by a member of staff. The site speed limit is 10 MPH.

First Aid boxes are located in the Transport Department, Weighbridge and Industrial Plant and trained First Aiders are listed in the Induction Manual located in the Weighbridge Office. A defibrillator is also located in the Weighbridge Office.

All vehicles which require sheeting should use the sheeting platform provided. When exiting the vehicle all drivers should wear appropriate PPE including hard hat, hi-viz jacket or vest, safety boots and when entering plants hearing protection. It is also advisable to wear safety glasses.

All deliveries of fuel, oil and ad-blue shall report to the weighbridge office and be directed to their discharge point by the Quarry Supervisor or Transport foreman.

Explosives and Ammonium Nitrate deliveries shall report to the Explosives Supervisor at an agreed delivery time.

All low loader deliveries and collections shall always be supervised by a member of management.

All movements of cranes and construction equipment on site will be organised to arrive and leave site by prior arrangement with the contractor and will be directed by a member of the management team to the designated working area.
